Frequently Asked Questions (FAQs)

Q1: Where can I find a Hewlett Packard 8591E spectrum analyzer manual?

A1: Unfortunately, HP no longer directly supports this discontinued model. However, various online marketplaces

(like eBay) and technical document archives may offer copies of the manual. Be cautious about the source and ensure it matches your specific 8591E configuration.

Q2: Is the HP 8591E still supported by HP or Keysight Technologies?

A2: No, the HP 8591E is a legacy product and is no longer officially supported by either HP (now HP Enterprise) or Keysight Technologies (the successor to HP's test and measurement division). Any support will be through third-party sources or community forums.

Q3: What is the difference between the resolution bandwidth (RBW) and video bandwidth (VBW)?

A3: RBW determines the analyzer's ability to resolve signals in the frequency domain. A narrower RBW improves resolution but reduces sensitivity. VBW controls the averaging time of the detected signal, smoothing out noise and improving the signal-to-noise ratio. The manual explains how to optimize these settings for various measurement types.
