Utilizing Advanced Google Search Operators and Techniques

This section focuses on improving your search efficacy. Learning advanced search operators is crucial to unlocking the true power of Google search. Here are a few examples:

- **`site:`** : Restrict your search to a specific website. For example, ``site:wikipedia.org history of the internet`` will only show results from Wikipedia.
- **`filetype:`** : Specify the file type you're looking for. ``filetype:pdf research paper on artificial intelligence`` will only return PDF files.
