FAQ

Q1: Where can I find Sanyo EM-FL90 parts?

A1: Finding Sanyo EM-FL90 parts can be difficult due to the projector's age and Sanyo's discontinuation of projector production. Online auction sites like eBay might be a good starting point. You may also need to search for compatible parts from other manufacturers, requiring some technical expertise to determine compatibility. Alternatively, you might need to source used parts from salvaged projectors.

Q2: Can I repair my Sanyo EM-FL90 myself?

A2: Repairing your Sanyo EM-FL90 yourself is possible, especially for simpler repairs like lamp replacement. However, more complex repairs require technical expertise and a thorough understanding of electronics. Using the service manual and exercising caution are crucial. If you're uncomfortable working with electronics, it's best to seek professional help.

Q3: What's the best way to clean the lens of my Sanyo EM-FL90?

A3: Clean the lens using a lens cleaning kit specifically designed for optics. Use a soft, microfiber cloth and lens cleaning solution. Gently wipe the lens in a circular motion, avoiding excessive pressure. Never use harsh chemicals or abrasive materials.

Q4: How often should I replace the lamp in my Sanyo EM-FL90?

A4: The lamp replacement frequency depends on usage and the type of lamp. Consult your service manual for the recommended replacement interval, typically measured in hours of operation. Noticeable dimming or color degradation are also indicators that a lamp replacement is needed.

Q5: My Sanyo EM-FL90 is not powering on. What could be wrong?

A5: Several issues can cause your projector to fail to power on. Check the power cord and outlet. Inspect the internal fuse (if accessible). If the fuse is blown, it might indicate a more serious internal problem, which you should only attempt to fix if you have experience working with electronics and are using the service manual. If you are not comfortable, contact a professional repair technician.

Q6: Can I upgrade the lamp in my Sanyo EM-FL90 to a brighter one?

A6: While it might seem tempting, upgrading to a brighter lamp could damage the projector's internal components due to increased heat generation. It's crucial to use only the lamp type specified in the service manual. Using an incompatible lamp voids any warranty and risks causing irreparable harm to your projector.

Q7: My Sanyo EM-FL90's image is blurry. What should I do?

A7: A blurry image can result from several factors, including a dirty lens, lamp failure, or misalignment of the projection optics. Clean the lens first. Check the lamp's condition. If neither solves the problem, you might need to adjust the focus and keystone correction settings, using the manual's instructions. More severe issues might require professional assistance.

Q8: Is it worth repairing an old Sanyo EM-FL90 projector?

A8: Whether repairing a vintage Sanyo EM-FL90 is worthwhile depends on several factors, including the cost of repair (parts and labor), the projector's sentimental value, and the availability of replacement parts. Weigh the cost of repair against the value of the projector and your personal attachment to it. Sometimes, the cost of repair can outweigh the value of the projector, making it more economical to replace it with a newer model.
