Q3: My LG Cosmos 3 battery drains quickly. What can I cause this?

A3: Rapid battery drain can stem from various factors. Check for applications running in the background (if applicable). Reduce screen brightness, disable unnecessary features, and ensure the battery itself isn't nearing the end of its lifespan. Excessive use of certain features, such as the camera and Bluetooth, can also contribute to quicker discharge.

Q4: How do I update the software on my LG Cosmos 3?
